LumaLayer Creations

Original 3D-printed designs & independently published books · Colorado · Founder: Amanda Winchester, maternal-fetal medicine sonographer

LumaLayer Creations is an independent creative studio in Colorado that designs and manufactures original 3D-printed objects and independently publishes books. The range runs from anatomical teaching models used in classrooms and clinics, through gothic and fantasy accessories, to children's picture books and coloring books. It is an unusual combination, and that is the point: every product starts from the same instinct, that if something useful or interesting does not exist, it can be designed and made.
